C (Continuation). DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
A	JP 9-124702 A (Nisshinbo Industries, Inc.), 13 May, 1997 (13.05.97), Claims 1 to 3 (Family: none)	1-17
A	WO 97/12917 A1 (RHONE-POULENC CHIMIE), 10 April, 1997 (10.04.97), Column 2, lines 9 to 12; Claim 1 & JP 11-513425 A Claim 1; page 5, lines 9 to 12	1-17

<Subject of search>

Claims 1 to 9 and 16 to 17 involve a great number of celluloses which are defined by the desired property "the loss tangent as a 0.5% by mass aqueous dispersion being less than 1". However, celluloses produced by a specific process (i.e., only part of the claimed celluloses) are exclusively disclosed by the description in the meaning as defined in PCT Article 5 and they are not supported in the meaning as described in PCT Article 6.

Since the parameter "the loss tangent as a 0.5% by mass aqueous dispersion being less than 1" has not been commonly employed in the art, the scope of celluloses specified by this parameter cannot be specified even though the common technical knowledge at the point of the application is taken into consideration. Thus, these claims do not comply with the requirement of clearness under PCT Article 6.

Such being the case, the search was made on the celluloses produced by the specific process specifically stated in the description.
